

DISTRICT 4-C5 LIONS PROJECTS

CITY OF HOPE

NATIONAL MEDICAL CENTER
AND BECKMAN RESEARCH INSTITUTE
www.cityofhope.org

City of Hope is recognized worldwide for its Compassionate patient care, innovative science and translational research, which rapidly turns laboratory breakthroughs into promising new therapies.

We are one of only 68 National Cancer Institute-designated Comprehensive Cancer Centers nationwide and a founding member of the National Comprehensive Cancer Network. An independent biomedical research, treatment and education institution, we are a leader in the fight to conquer cancer, diabetes, HIV/AIDS and other life-threatening diseases.

On our park-like campus just northeast of Los Angeles, researchers advance ideas into discoveries, physicians bring emerging therapies to patients, and students learn to transform the landscape of modern medicine all supported by the generosity of philanthropists from across the country.

Every day we pursue new and better ways to improve the lives of men, women and children here and around the world.

For over 100 years, City of Hope's pioneering research has brought the world closer to cures for many life-threatening diseases, from cancer to diabetes.

Compassion drives our innovation. Every discovery we make and new treatment we develop gives patients the chance to live longer, better and more fully.

As an independent medical and research institution, we can break through the barriers that traditionally stand between scientists and physicians, accelerating the application of laboratory findings to more effective treatments. We work with urgency because time matters. Patients with cancer need better options today, not next week or next year.

Please mail all club and individual donations to:

Michelle Vigue, Assistant Director of Development
